

FastMaterial changer(Normal&URP)

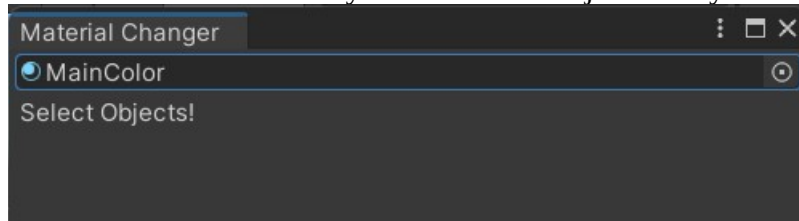

Quick and easy-to-use tool allows you to change material in selected game objects. It has the ability to change selected parts as well as entire objects with 1 click.

Forget dragging material forever and selecting each object one by one. Using "!" at the beginning of the object name will make it skip and go on to the next objects.

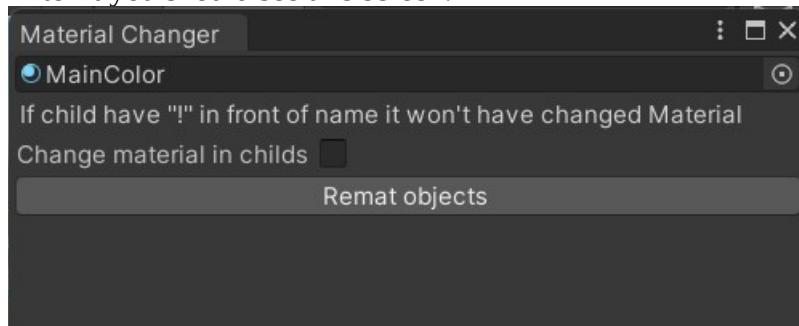

You can find it in Tools>Crazy>Material Changer.

After opening this tool you have to add material what you want to use
When material is selected you must select object what you want to change material

After it you should see this screen:

Here you can check that materials in all childs of selected objects without „!" in start of their name have to change material.

Here is only the most easy think to do- click button.
